

Why Spectre

No Conflict of Interest

Unlike traditional binary option or Forex (FX) brokers, who make money when you lose, Spectre.ai simply earns a volume-based technology fee when you trade (regardless of outcome, win or lose). By utilizing cutting-edge, crowd-sourced technology, Spectre.ai matches traders against an embedded liquidity pool or other traders on the Spectre trading platform. 24-hour liquidity and zero-opportunity for broker fraud is ensured in this unique model!

Unique Contract Range

Spectre.ai is the first platform to allow retail traders to trade Digital Contracts, a unique trading contract-class with a verified outcome resulting in payouts of up to 100%, within just minutes. Digital Contracts can be traded on a range of assets including traditional currency pairs, commodities such as gold and silver, and EPICs.

U-Token Privileges

Spectre is the world's first financial trading platform that features key unlocks for traders who hold the special Utility Token (SXUT), an internal currency based privilege enabler! This means those who hold this token in their digital wallet can enable higher payouts, more assets, higher trade sizes and a range of other benefits, thereby super-charging their potential.

Shariah Compliant Trading

Fully Shariah compliant, we offer Islamic trading with no fees whatsoever. This allows our clients that honour the Islamic faith the ability to trade on the Spectre.ai platform in a fair and ethical manner, completely fraud-free, with no hidden costs. These same highly attractive trading conditions are available to all our clients, irrespective of their faith or beliefs.
